

Dear Colleague,

Thank you for choosing to submit your previous findings, and for trusting Springer with your work.

We continually aim to improve our service to our communities, and to help authors like you make their submission process as simple and effective as possible. As part of Springer Nature, we offer a variety of **services and tools** which have helped many previous authors **improve their submission experience**. These include ways to avoid common issues that can sometimes slow authors down in getting their articles accepted.

## 6 ways to help smooth your submission process

---

### [Questions to ask yourself as you prepare your manuscript](#)

Get advice from the Springer Nature team on getting your manuscript ready for publication, via [The Source Blog](#).

### [Try the Springer Nature Journal Suggester](#)

Based on your abstract, this AI system helps you build your submission plan by [suggesting journals matching your keywords](#). Already decided where to submit? Find your journal on our [A-Z list](#) to review the submission guidelines and find contacts for any questions.

#### [Get a fast, free online grammar check](#)

Make sure your manuscript is accurate and readable with a [free language assessment and recommendation tool](#) from AJE (American Journal Experts).

#### [Understand your options for publishing open access \(OA\)](#)

Most Springer journals offer open access publishing through [Open Choice](#) while other journals are [fully open access](#). Unsure of the funding available to you? Springer Nature's [OA funding and support service](#) can help.

#### [Ensure you get credit for your work](#)

Attach your unique identity to your research and include your ORCID iD in our manuscript submission systems. ([What is ORCID?](#))

#### [How the Springer Nature Transfer Desk can help](#)

In case you need to move on from your first-choice journal, [we can help your manuscript find its best home](#), saving time and trouble for you.

[See more services for authors](#)

### Do you still have questions?

- For journal-specific questions please visit the journal website to find your best contact. You can find journals [by discipline](#) or [listed A-Z](#).
- For more general questions about publishing with Springer, please visit [Springer support](#).
